# Setting import tolerance in Japan

---

Japan does not establish MRL originally but import MRL established in foreign countries. You have to propose to setting ADI/ARfD and MRL with support data to establish it. So you need toxicological data for ADI setting and relevant plant metabolism data and crop residue data for MRL.

**Regulation: Guideline for Application for Establishment and Revision of Maximum Residue Limits for Agricultural Chemicals used outside Japan**

<https://www.mhlw.go.jp/english/topics/foodsafety/residue/index.html>

# Procedure

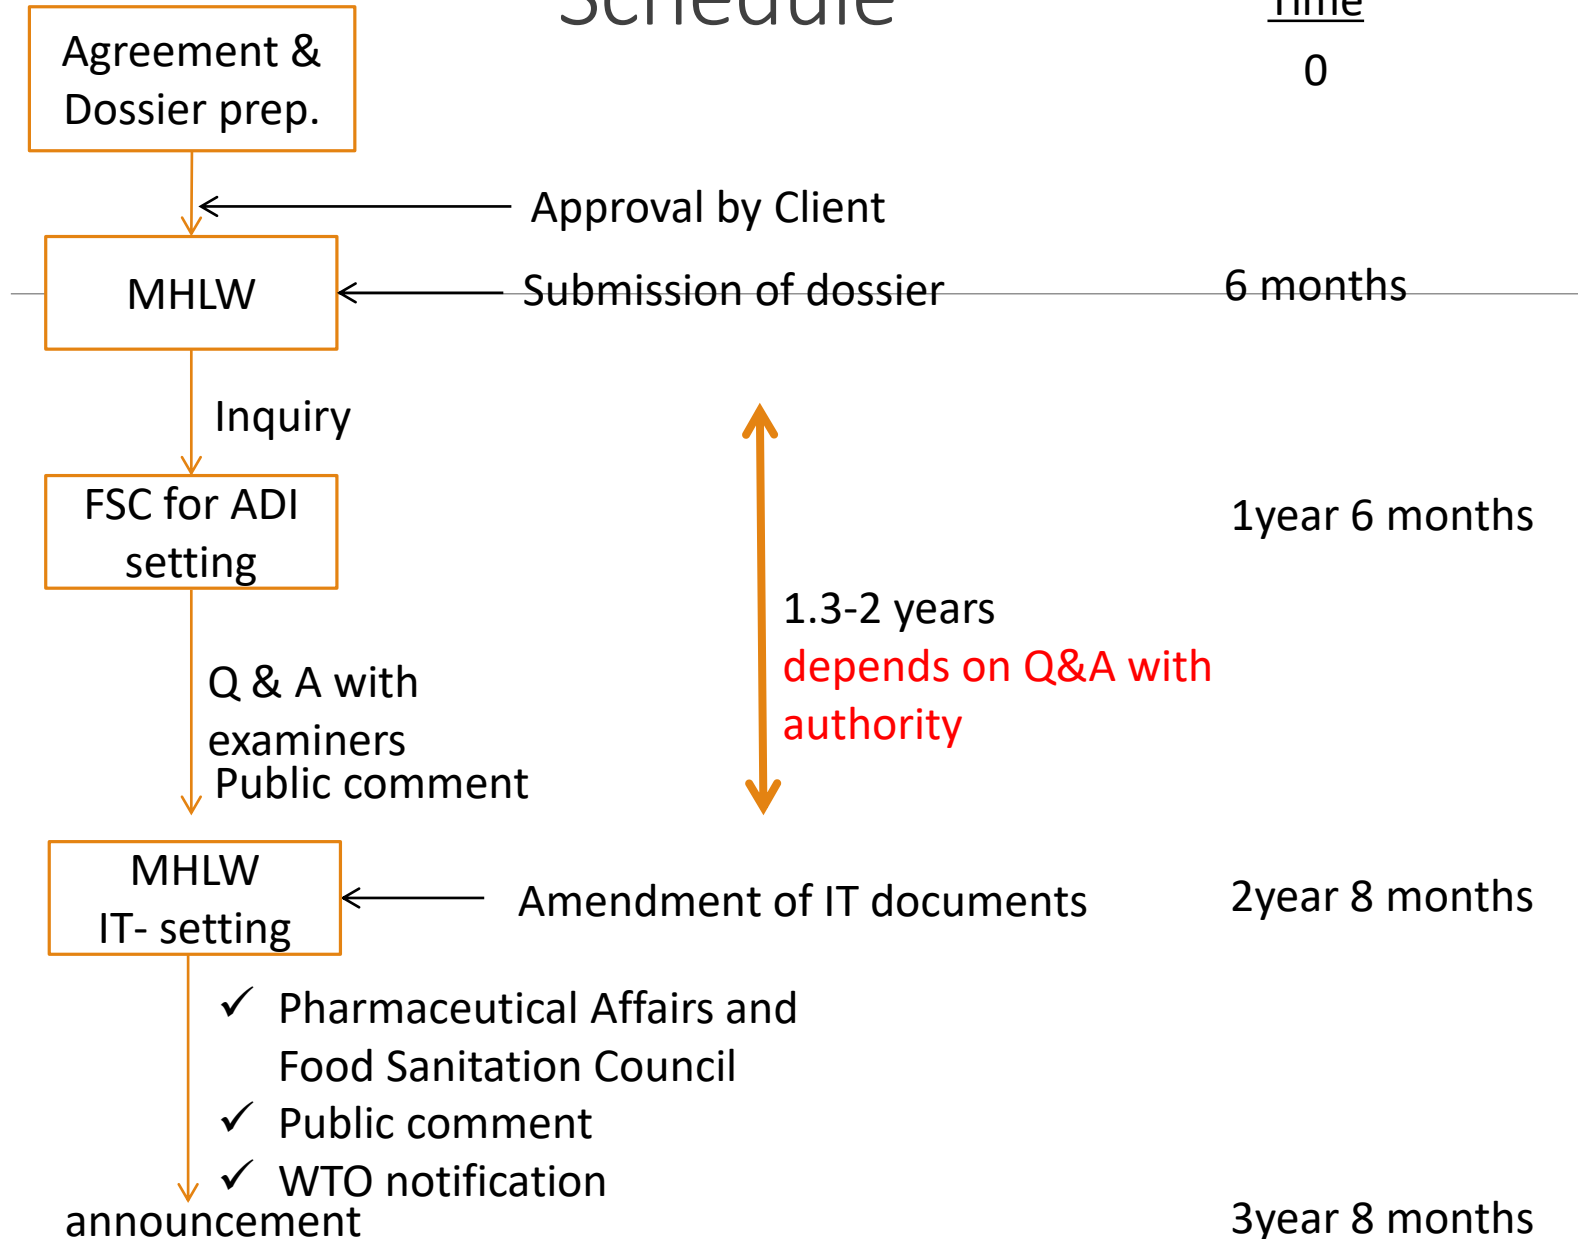

---

1. You need an agent to prepare a Japanese application dossier, apply and correspondence with the authorities of MHLW (Ministry of Health, Labour and Welfare) and FSC (Food Safety Commission of Japan).
2. Joy Consulting Ltd.(JOY) has much experience of setting of import tolerance for EU companies and US companies.
3. Necessary data for setting ADI/ARfD/MRL: AI identification, toxicological report, plant metabolism report and crop residue trial reports.
4. JOY prepares an application form, identification of AI , summary of physical chemical properties and environmental fate, summary reports of toxicological reports and plant metabolism/crop residue trial reports, and proposed MRL.
5. JOY submit it to authority and manage until setting ADI/ARfD/MRLs.
