

Japan Pesticide TGAI Regulation

We can support your TGAI sales in Japan.

March 2022
Joy Consulting Ltd.

NOTE in Japanese Pesticide Registration System

- There is no registration system of TGAI in Japan.
- TGAI is always registered as a part of pesticide registration.

Thus, TGAI manufacturers should find formulators who (1) have registration, or (2) is registering a formulation.

Japan pesticide guideline has changed in 2019

Main changes:

1. Re-evaluation of safety of pesticides every 15 years has started.
2. Official TGAI specification system is determined at re-evaluation.
3. Generic registration system has started for AI ≥ 15 years old

Sales of TGAI matching official spec.

(1) Official TGAI spec. has determined at new pesticide registrations or re-evaluation for existing TGAI.

(2) Official TGAI spec. is constituted with lower limit of AI purity and upper limits of impurities for which toxicity should be concerned.

(3) Besides the above, other impurities $\geq 1\text{g/kg}$ should be explained as for safety. Impurity $< 1\text{g/kg}$ is not asked as to safety. Above 98% of TGAI should be identified in TGAI.

Sales of TGAI without official spec. established

For TGAI manufatuerers,

1. Target company is who is planning to get new registration, where there is no limitation of purity and impurities, or
2. who has already gotten pesticide registration, for which your TGAI quality should meet the registrant's toxicity TGAI batch(limitation of purity and impurities)

Strategy of TGAI business 1

Age of registration	Official TGAI spec.	Business targets
≥15 years old	Matched	(1) Full generic registrant
		(2) Existing registrant
	Not matched	(3) Existing registrant
		(4) limited generic registration
<15 years old	Matched	(5) Existing registrant
		(6) New registrant for off-patent TGAI
	Not matched	(7) Existing registrant
		(8) New registrant for off-patent TGAI

Joy's Information service for TGAI manufacturers

- (1) New registrations (AI, Use, registration holder), Official TGAI specification, generic registrations and re-evaluation
- (2) List of AIs >15 years old and Registrants
- (3) Official TGAI specification
- (4) Pesticide sales by AI
- (5) Preparation of necessary dossier of TGAI for registration
- (6) Report is prepared of required information by client
